Where Quality Breeds Success

Vittorio

Unique Combination of Quality and Yield for White and Green Production

Key benefits

- Early season production
- Attractive white colour
- Excellent flavour through very low fibre levels
- Exceptionally high yields

Vittorio is a new white asparagus hybrid that was bred in the north of Italy. The variety is characterised by a range of attractive features; these include very high yields, early season production and an excellent flavour profile. One of the significant advantages of this cultivar is that it offers a combination of traits that are attractive not only to commercial growers but also to the consumer.

For asparagus production to be profitable, it is important that growers can plant varieties that have high levels of production at a time of the season when prices are best, but also for consumers to be so impressed with the taste of the variety that they come back to the retail outlets to purchase more. Vittorio asparagus delivers on all of these counts.

Variety Lowdown

Climate	Bred in the North of Italy, Vittorio performs at its best in cool and temperate growing regions.
Quality	Excellent quality asparagus with uniformly thick spears. Very tight tip closure. Low fibre levels within the spears.
Hybrid	Male Hybrid. F1 type. Seeds of the variety are produced in a protected growin environment.
Yield	Vittorio is a very high yielding asparagus hybrid Replicated trials show improved performance over standard cultivars.
Agronomy	Vittorio is a vigorous asparagus variety. Tolerant to Fusarium and Asparagus rust.
Foliage	Strong stem with foliage growth.
Seasonality	Vittorio is an early season asparagus variety. The use of protected growing environments brings forward the harvest season.

Market

- Suitable for all main green asparagus market types
- Especially used for the fresh market due to its excellent all-round spear quality

Offer

- Exclusive certified F1 seeds
- Crowns are offered by a range of nurseries and should be ordered a year in advance
- Technical advice to make the most of the hybrid

Reviews

“Vittorio is an excellent product, very white colour, tightly closed tip, good, homogeneous size, very little fibrousness, excellent to eat and also very productive, good yield in the field.
Excellent processing in post-harvest, no rust, very white spears with no symptoms of disease, there is no need to do further processing, just wash it.”
