PACIFIC SUMMIT BENEFITS

✓ **Excellent high yields produced mid-season in hotter production locations**

✓ **All green spears with superb quality and very tight heads at lengths of 25cm**

Pacific Summit asparagus provides optimum performance in hot climates due to its extremely closed tip spears. Growers can also benefit from season extension using the 'northern fern' technique with Pacific Summit in suitable locations.

✓ **Suitable for inclusion in "mother fern" harvesting techniques in the right growing places**

✓ **Seeds of Pacific Summit are free from the most impactful viruses that affect asparagus plantings**

A high performing asparagus hybrid that is adapted to production in hotter growing regions. Pacific Summit offers an excellent continuation of spear quality and high yields in the mid season

PACIFIC SUMMIT OVERVIEW

Climate

Ltd Pacific Summit has an exceptionally tight head, making it suitable for hot climates

Quality

Produces an all-green spear that keeps a very tight head at 25cm.
Seed is free of Asparagus Virus 1

Hybrid

Clonal Hybrid. Seeds are produced in a protected environment

Yield

High yielding asparagus hybrid. It performs well in hot spring growing conditions

Foliage

Strong stem with foliage growth

Seasonality

Pacific Summit is a mid-season asparagus variety. It can also be used in the “mother fern” technique in order to extend the harvest season

Agronomy

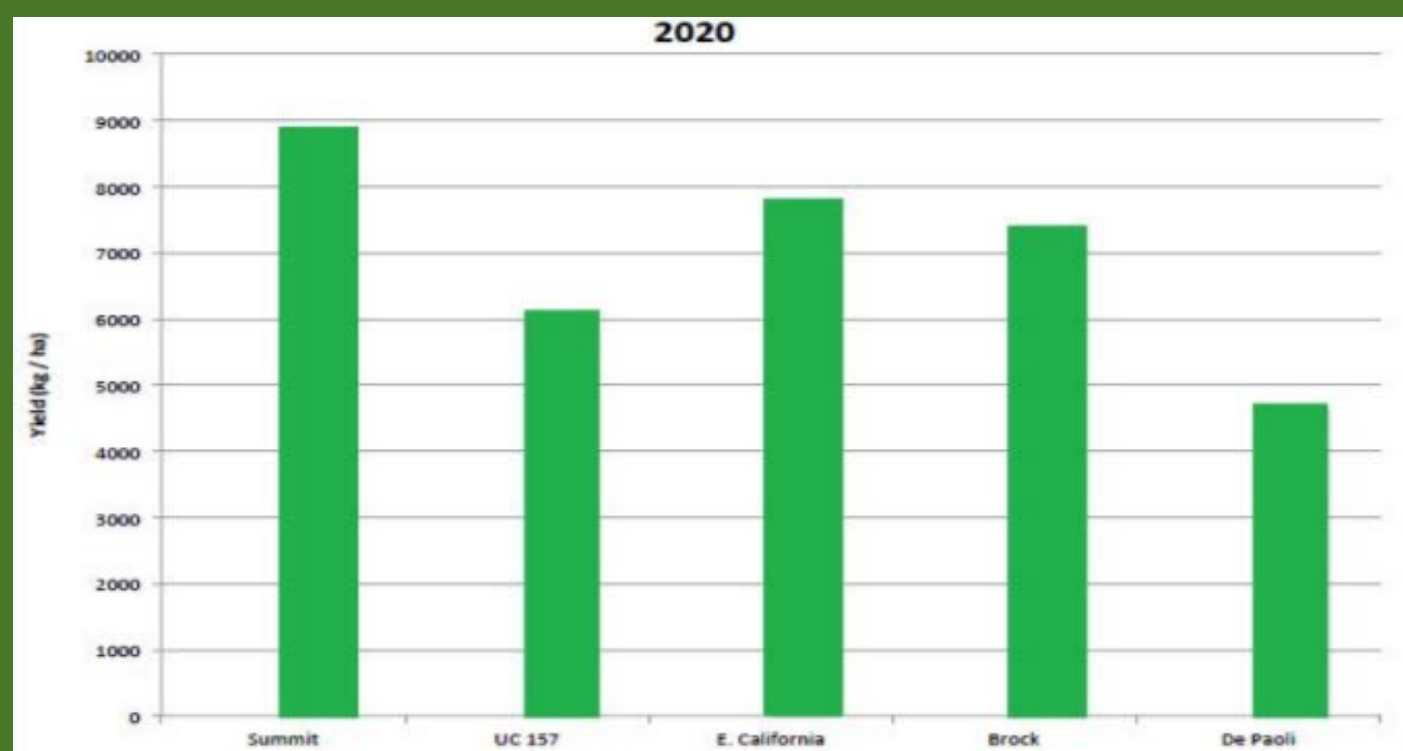

For maximum yields a planting density of 35,000 plants /ha is recommended. For green asparagus plant at 15-20cm deep

PACIFIC SUMMIT OVERVIEW

Market

- ✔ Suitable for all current asparagus market types
- ✔ Very well adapted to local fresh or export markets due to its exceptional tip quality

Offer

- ✔ Exclusive certified seeds
- ✔ Crowns are offered by a range of nurseries and should be ordered a year in advance
- ✔ Technical advice to make the most of the hybrid

PACIFIC SUMMIT REVIEW

“Summit produces the best quality spear I have seen in my 40 years of breeding asparagus. In the past we have used UC 157 as the gold standard for green asparagus but Summit far surpasses UC157 in both spear quality and yield. Pacific Summit sets a new standard for spear quality. Summit is a top performer in Asia, Central America and New Zealand which means it is adapted to growing in a wide range of environments. Since the seed of Summit is free of asparagus viruses, fields of Pacific Summit will tolerate the ravages of Fusarium decline, staying highly productive for longer.”
