PACIFIC GREEN BENEFITS

- ✔ **Leading variety in warm and hot growing regions**
- ✔ **Seed has freedom from the most damaging viruses that can severely damage asparagus plantations**

Industry leading spear quality that thrives in warm/hot asparagus growing locations. High yields of these spears that start in the early/mid harvesting season. The spears of Pacific Green are also all green, making the hybrid suitable for all the main asparagus market types. Seed has freedom from the most damaging viruses that can severely damage asparagus plantations. The highest yields of Pacific Green can be achieved by using 35000 plants per hectare and a depth of 15-20cm.

- ✔ **Premium quality asparagus spears and high yields**

- ✔ **Early season asparagus hybrid with an all-green spear**

Premium quality asparagus spears combined with high yields make Pacific Green a leading variety in warm and hot growing regions. In addition, it is an early season asparagus hybrid with an all-green spear.

Agronomy -

For maximum yields a planting density of 35,000 plants/ha is recommended. For green asparagus plant at 15-20cm deep.

PACIFIC GREEN OVERVIEW

Climate

Bred in the temperate climate of New Zealand by Aspara Pacific Ltd. Thrives in temperate and warm continental climates

Quality

Produces an all- green spear that keeps a tight head at 25cm (10 inches). Seed is free of Asparagus Virus 1, Asparagus Virus 2 and Tobacco Sreak Virus

Hybrid

Clonal Hybrid Seeds are produced in a protected environment

Yield

Pacific Green is a high yielding hybrid. It produces exceptionally well in southern Europe and in temperate production regions

Foliage

Strong stem with foliage growth

Seasonality

Pacific Green is an early to mid-season variety

Agronomy

For maximum yields a planting density of 35,000 plants/ha is recommended. For green asparagus plant at 15-20cm deep

PACIFIC GREEN OVERVIEW

Market

- ✔ Suitable for all main green asparagus market types
- ✔ Very well suited for local fresh or export markets due to its excellent tip quality

Offer

- ✔ Exclusive certified seeds
- ✔ Crowns are offered by a range of nurseries and should be ordered a year in advance
- ✔ Technical advice to make the most of the hybrid

PACIFIC GREEN REVIEW

“I named this new hybrid Pacific Green because of the beautiful green spear it produces. Pacific Green is performing exceptionally well in southern Europe and will be an excellent variety for asparagus growers in that region. Like all our hybrids of green asparagus, seed of Pacific Green is certified free of asparagus viruses, which is important in prolonging the life of asparagus fields. Asparagus virus 2 makes the plants more susceptible to Fusarium rot so having access to virus-free seed is the key to reducing the effect of this debilitating disease.”
