PACIFIC ENDEAVOUR BENEFITS

- ✦ High yielding asparagus cultivar
- ✦ Best suited for production in temperate growing regions
- ✦ Spears are medium to large in diameter and have excellent tip closure

Variety Specification -

Pacific Endeavour is an early to mid-season hybrid that is at its best in temperate and cool environments. The spears of the variety are all green with a slight purple blush at the base. Its spear quality and tip closure are very good, making Pacific Endeavour adaptable to all asparagus markets. Seeds of Pacific Endeavour are free of the major viruses that can affect asparagus crops. Due to its medium-thick spear diameter, recommended planting densities are 35-40,000 plants per hectare, using a depth of 10-15cm

PACIFIC ENDEAVOUR OVERVIEW

Climate

Bred in the temperate climate of New Zealand by Aspara Pacific Ltd. Thrives in temperate and cool growing environments

Quality

Pacific Endeavour produces a green spear with a slight purple blush at the base. Spears are medium to large in diameter. Freedom from Asparagus Virus 2 means Pacific Endeavour is less susceptible to Fusarium

Hybrid

Clonal Hybrid Seeds are produced in a protected environment

Yield

Pacific Endeavour is a high yielding hybrid. In temperate regions it produces a high proportion of its spears in early to mid season

Foliage

Strong stem with foliage growth

Agronomy

For maximum yields from this hybrid a planting density of 35-40,000 plants/ha is recommended

Seasonality

Pacific Endeavour is an early to mid-season variety

PACIFIC ENDEAVOUR OVERVIEW

Market

- ✔ Suitable for all market types, including fresh and processing
- ✔ The fresh market is its most common use but it can also be used for processing

Offer

- ✔ Exclusive certified F1 seeds
- ✔ Crowns are offered by a range of nurseries and should be ordered a year in advance
- ✔ Technical advice to make the most of the hybrid
